Letter of Appreciation & Performance Excellency – Al Fayid Contracting

I am writing to provide an enthusiastic recommendation for the exceptional performance delivered by our subcontractor, Al Fayid, on the infrastructure projects.

We have undertaken within Iraq, particularly in the field of electrical distribution and generation. As the Iraq Program Manager at Nanocon, I have had the privilege of closely working with Al Fayid and monitoring their contributions to our projects.

Al Fayid has consistently demonstrated a high level of professionalism, commitment, and technical expertise throughout their involvement in our infrastructure projects. Their contributions have been instrumental in the successful execution and completion of various phases of these projects, ensuring they meet or exceed the established standards and timelines.

Here are some key points that highlight Al Fayid's outstanding performance:

- 1- **Technical Excellence:** Al Fayid's technical knowledge and capabilities in electrical distribution and generation have been nothing short of exceptional. Their team of experts consistently delivered innovative solutions, resolving complex issues efficiently and effectively.
- 2- **Quality Workmanship:** The work completed by Al Fayid has consistently met and exceeded industry standards for safety and quality. Their attention to detail and commitment to producing top-notch results have been commendable.
- 3- **Adaptability:** In the ever-evolving field of infrastructure development, Al Fayid has proven their adaptability to changing circumstances and unforeseen challenges.
- 4- **Safety:** Al Fayid's commitment to safety is noteworthy. They consistently adhered to safety protocols and regulations, ensuring the

well-being of all personnel involved in the projects.

- 5- **Cost Efficiency:** Al Fayid has demonstrated a commitment to cost-effectiveness without compromising the quality of work. Their efficient resource management has been instrumental in keeping project budgets in check.

Below the are some of the Projects executed by Al fayid :

- 1- Design and Construction of Infra structure for Military schools in Taji Camp /North Baghdad.

Client: USA – AFCEE

Period of performance: 180 days in 2006.

Contract No. : 8505-S04-SP-1125 –SC

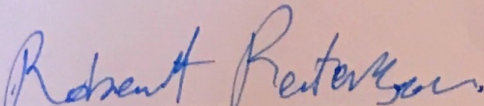

Location: Different military schools / Taji Camp

Description of Work:

- Design & Construction of Electrical Generation Plant to produce 6MVA /11KV of electrical power to supply major parts of Camp Taji. The location of plant is at MOD2 area.
- Design & Implementation of Electrical Transmission line (11KV) to supply different area in the north of Baghdad, the total is about 14 KM of of electrical transmission line.
- Design and implementation of Electrical LT Distribution network in different area in north of Baghdad. The total quantity of distribution cable laying is about 20 KM.
- Design and built of Waste water distribution lines in Camp Taji /North Baghdad. Total pipes lying are about 23 KM.
- Design and built of Waste water different size Pump stations
- Design and built of Potable water distribution Networks. Total pipes lying are about 25KM

- 2- Prime Contract with USACE (Contract W917BE-08-D-0013)

Nanocon has been awarded an IDIQ contract with USACE in maximum total ceiling of 40 million US\$. Nanocon Subcontract Alfayid in all Tasks and it got nine Electrical infra structure task orders out of twenty orders through its continuous commitment to the success of the work in any situation.

Robert Peterson -Iraq Program Manager
